

## Construction

**Our Virtual Guards can monitor the construction site remotely. This allows for real time assessment of situations without needing to be physically present.**

Virtual guarding is essential for construction sites due to several critical factors. Construction sites are vulnerable to theft, vandalism, and unauthorized access, especially during off-hours when physical presence is minimal. By utilizing our remote guards, construction sites can achieve a higher level of security, ensure the safety of assets, and maintain uninterrupted progress on their projects.

Virtual guarding provides continuous, 24/7 monitoring, ensuring that any suspicious activity is immediately detected and addressed. This constant surveillance deters potential intruders and vandals, significantly reducing the risk of costly damage and theft of valuable materials and equipment.

Additionally, virtual guarding leverages advanced technologies such as motion detection, data and video analytics, and real-time alerts, which enhance the overall security infrastructure and allow for rapid response to incidents. The ability to remotely monitor multiple areas of a construction site simultaneously also increases efficiency and coverage compared to traditional security methods. Moreover, virtual guarding is often more cost-effective, eliminating the need for on-site security personnel and reducing associated expenses.

## Security Features

### Loitering

Keep a close watch on who enters & exits your work site.

### Break-In

Identify and stop forced entry before it occurs.

### Vandalism

Keep potential damage away from your work site.

### Theft

Protect your job site equipment & machinery from theft.

### Unwanted

Keep protected areas safe by keeping unwanted visitors away.

### Unhealthy

Ensure anyone who enters does not pose a health threat.

## Intelligent live video monitoring for construction sites.

Virtual Guarding provides 360 degrees of security monitoring for construction sites. We begin by establishing an invisible perimeter around your construction site with our high-definition security cameras, and then monitor those cameras live with our hybrid use of human intelligence and artificial intelligence. These virtual security guards are stationed at our Global Fusion Center to monitor your property 24/7.

Our hardware incorporates advanced features such as immediate live audio trespasser deterrents, remote door monitoring for unsecured entrances and exits. Our 4 step process, developed over years in the industry, enables our agents to respond up to 10x faster than traditional intrusion systems that may not even see incidents occurring until several minutes after they have already occurred.

With this as the new standard for construction site monitoring and security, are you protecting your equipment, workers, and property effectively? Get a quote today and find out how Virtual Guarding can help.

# Our Services

## Virtual Guarding

- Substitute or Enhance Guard Service Anywhere
- AI Based Video Monitoring
- Event Alerting & Response
- Guest & Visitor Screening
- Audible Deterrent Or Police Dispatch
- System Health & Environmental Monitoring
- Door Ajar Monitoring
- Panic Button/Call for Help Alert and Response
- Occupancy Alert Notification
- Incident Reporting

## Virtual Gatehouse

- Replace Guard In Gatehouse/ Guard Booth
- Includes All Virtual Guarding Services
- Homeowner Entry Assistance & Event Alerting
- Guest & Visitor Screening with Remote Entry
- License Plate Verification & Reporting

## Four Steps To Get The Security You Need

# How It Works

Reduced Operational Costs • Safer – No Physical Contact • 24/7 Security Monitoring and Support  
• Deter Crime and Trespassers Proactively • Immediate Response • Enhanced Security

### Step 1

#### Cameras Detect

Cameras stream within seconds using AI to detect potential threats.

**Milliseconds**

### Step 2

#### Guards Analyze

Remote guards can respond to potential threats instantly using customized SOP's.

**5-20 Seconds**

### Step 3

#### Rapid Response

Remote guards engage potential criminals with two-way audio.

**10-30 Seconds**

### Step 4

#### Escalate As Needed

On-site guards or law enforcement are dispatched.

**Minutes**
