

Municipalities

The U.S. Bureau of Justice Statistics estimates that vandalism to government property costs over \$1 billion annually, with a significant portion targeting critical infrastructure.

Virtual Guarding offers municipalities and government entities 24/7 surveillance of their districts -of-the-art remote guard monitoring. Our virtual guarding services provide a team of live virtual security guards who monitor buildings and recreational areas in real-time, to include both drone and robotic capabilities, offering a cost-effective alternative to traditional physical security guards.

- Government Buildings and Administrative Offices: Ensure the security and integrity of sensitive government operations and documents.
- Public Parks and Recreational Areas: Maintain a safe environment for community members enjoying outdoor spaces.
- Libraries and Community Centers: Protect places where citizens gather for education and social activities.
- Parking Facilities and Transit Hubs: Monitor areas that are often targets for theft and vandalism.
- Schools and Educational Institutions: Enhance the safety of students and staff with constant surveillance.
- Special Events and Public Gatherings: Provide security during large-scale events to manage crowds and prevent incidents.

Our services ensure comprehensive safety across various public spaces. By leveraging advanced technology and offering, we provide reliable and proactive security services that meet the dynamic needs of today's municipal districts.

Security Features

Loitering

Keep a close watch on who enters & exits your property.

Break-In

Identify and stop forced entry before it occurs.

Vandalism

Keep potential damage away from your property.

Theft

Protect your business assets from theft.

Unwanted

Keep protected areas safe by keeping unwanted visitors away.

Unhealthy

Ensure anyone who enters does not pose a health threat.

Intelligent live video monitoring for municipal districts.

Virtual Guarding provides 360 degrees of security monitoring for municipality facilities. We begin by establishing an invisible perimeter around your property with our high-definition security cameras, and then monitor those cameras live with our hybrid use of human intelligence and artificial intelligence. These virtual security guards are stationed at our Global Fusion Center to monitor your property 24/7.

Our hardware incorporates advanced features such as immediate live audio trespasser deterrents, remote door monitoring for unsecured entrances and exits. Our 4 step process, developed over years in the industry, enables our agents to respond up to 10x faster than traditional intrusion systems that may not even see incidents occurring until several minutes after they have already occurred.

With this as the new standard for municipal buildings monitoring and security, are you protecting your inventory, staff, and property effectively? Get a quote today and find out how Virtual Guarding can help.

Our Services

Virtual Guarding

- Substitute or Enhance Guard Service Anywhere
- AI Based Video Monitoring
- Event Alerting & Response
- Guest & Visitor Screening
- Audible Deterrent Or Police Dispatch
- System Health & Environmental Monitoring
