

Co-Op Security Solutions

Guard your complex at a fraction of the cost.

Co-op apartment complexes have a lot of people entering and exiting the property. Tenants, guests, delivery couriers, maintenance personnel, and more will go through the doors of the complex lobby. How do property managers ensure their complexes are secure, with the rising costs of security guards and doormen? Virtual Guarding is here to help.

Virtual Guarding offers 24/7 surveillance of your property by utilizing remote guard monitoring from a central security operations center. With our remote guarding services, your property receives a team of live virtual security guards that monitor your property without the physical security guard cost normally associated with hiring a security guard company.

Virtual Concierge is a service offered by Virtual Guarding that is tailored to high-rise apartment buildings as an alternative to a physical doorman. With guest and visitor screening, package acceptance, and event alerting and response, your residents will thank you for investing in a convenient and high-tech service for your building.

Security Features

Loitering

Keep a close watch on who enters & exits your property.

Break-In

Identify and stop forced entry before it occurs.

Vandalism

Keep potential damage away from your property.

Theft

Protect your business assets from theft.

Unwanted

Keep protected areas safe by keeping unwanted visitors away.

Unhealthy

Ensure anyone who enters does not pose a health threat.

Intelligent live video monitoring for residential complexes.

Virtual Guarding provides 360 degrees of security monitoring for property security. We begin by establishing an invisible perimeter around your property with our high-definition security cameras, and then monitor those cameras live with our hybrid use of human intelligence and artificial intelligence. These virtual security guards are stationed at our Global Fusion Center to monitor your property 24/7.

Our hardware incorporates advanced features such as immediate live audio trespasser deterrents, remote door monitoring for unsecured entrances and exits. Our 4 step process, developed over years in the industry, enables our agents to respond up to 10x faster than traditional intrusion systems that may not even see incidents occurring until several minutes after they have already occurred.

With this as the new standard for property monitoring and security, are you protecting your property, staff, and tenants effectively? Get a quote today and find out how Virtual Guarding can help.

Four Steps To Get The Security You Need

How It Works

Reduced Operational Costs • Safer – No Physical Contact • 24/7 Security Monitoring and Support
• Deter Crime and Trespassers Proactively • Immediate Response • Enhanced Security

Step 1

Cameras Detect

Cameras stream within seconds using AI to detect potential threats.

Milliseconds

Step 2

Guards Analyze

Remote guards can respond to potential threats instantly using customized SOP's.

5-20 Seconds

Step 3

Rapid Response

Remote guards engage potential criminals with two-way audio.

10-30 Seconds

Step 4

Escalate As Needed

On-site guards or law enforcement are dispatched.
