

## Cannabis

### Secure Your Cannabis Business from Seed to Sale with Advanced AI Analytics and Security Solutions with Virtual Guarding.

The cannabis industry faces unique security challenges due to high value of its products and the evolving regulatory landscape. This makes cannabis facilities prime targets for theft and vandalism. Virtual Guarding has emerged as a critical solution to address these challenges effectively. Virtual Guarding provides 24/7 remote monitoring for your cannabis facility from a central security operations center, offering live virtual security guards without the high cost of physical security.

Virtual Guarding offers comprehensive monitoring of cannabis production from seed to plant. This includes surveillance of grow farms, greenhouses, manufacturing and production facilities, as well as distilleries. By utilizing advanced technology, we ensure immediate response to any signs of distress or emergencies, thereby safeguarding your product at every stage of its lifecycle.

In addition to production oversight, we help optimize growth production through environmental monitoring and provide enhanced robotic capabilities for large-scale facilities. Virtual Guarding extends its protective measures to the movement and transportation of the product on location with specified AI analytics, ensuring that it remains secure throughout the supply chain. By eliminating the need for physical contact, our virtual security solutions help maintain a safe and secure environment for your facility, ensuring the integrity and safety of your cannabis production process.

## Security Features

### Loitering

Keep a close watch on who enters & exits your property.

### Break-In

Identify and stop forced entry before it occurs.

### Vandalism

Keep potential damage away from your property.

### Theft

Protect your business assets from theft.

### Unwanted

Keep protected areas safe by keeping unwanted visitors away.

### Unhealthy

Ensure anyone who enters does not pose a health threat.

## Intelligent live video monitoring for cannabis production facility.

Virtual Guarding provides 360 degrees of security monitoring for cannabis facilities. We begin by establishing an invisible perimeter around your property with our high-definition security cameras, and then monitor those cameras live with our hybrid use of human intelligence and artificial intelligence. These virtual security guards are stationed at our Global Fusion Center to monitor your property 24/7.

Our hardware incorporates advanced features such as immediate live audio trespasser deterrents, remote door monitoring for unsecured entrances and exits. Our 4 step process, developed over years in the industry, enables our agents to respond up to 10x faster than traditional intrusion systems that may not even see incidents occurring until several minutes after they have already occurred.

With this as the new standard for cannabis facilities monitoring and security, are you protecting your inventory, staff, and property effectively? Get a quote today and find out how Virtual Guarding can help.

## Our Services

### Virtual Guarding

- Substitute or Enhance Guard Service Anywhere
- AI Based Video Monitoring
- Event Alerting & Response
- Guest & Visitor Screening
- Audible Deterrent Or Police Dispatch
- System Health & Environmental Monitoring
- Door Ajar Monitoring
- Panic Button/Call for Help Alert and Response
- Occupancy Alert Notification
- Incident Reporting

### Virtual Gatehouse

- Replace Guard In Gatehouse/ Guard Booth
- Includes All Virtual Guarding Services
- Homeowner Entry Assistance & Event Alerting
- Guest & Visitor Screening with Remote Entry
- License Plate Verification & Reporting

### Virtual Package Delivery

- Virtual Screening of Authorized Delivery Services
- Virtual Unlock & Visual Monitoring of Mail Rooms & Warehouses
- Contactless Delivery & Operational Costs
- Live Event Alerting & Response During Deliveries
- Access Control with QR code or Facial Recognition

### Virtual Concierge

- All Virtual Package Delivery Services & Remote Guarding Services
- Enhance Lobby Guard or Doorman
- Tenant Entry Assistance
- Live Property Event & Notification Reporting
- Direct Emergency Response or Police Dispatch

## Four Steps To Get The Security You Need

## How It Works

Reduced Operational Costs • Safer – No Physical Contact • 24/7 Security Monitoring and Support  
• Deter Crime and Trespassers Proactively • Immediate Response • Enhanced Security

### Step 1

#### Cameras Detect

Cameras stream within seconds using AI to detect potential threats.

**Milliseconds**

### Step 2

#### Guards Analyze

Remote guards can respond to potential threats instantly using customized SOP's.

**5-20 Seconds**

### Step 3

#### Rapid Response

Remote guards engage potential criminals with two-way audio.

**10-30 Seconds**

### Step 4

#### Escalate As Needed

On-site guards or law enforcement are dispatched.

**Minutes**
