

Entertainment

According to the U.S. Department of Justice, nearly 40% of violent crimes are linked to alcohol consumption, which is prevalent in bar and nightclub settings.

Nightlife venues, such as clubs, bars, and entertainment spots, face unique security challenges that make Virtual Guarding an increasingly essential solution. These establishments often operate during late hours, attracting large crowds where incidents like altercations, vandalism, or unauthorized entry are more likely to occur. Traditional security measures may not be sufficient to monitor every corner or respond to threats in real time. Virtual Guarding provides 24/7 remote surveillance, using advanced technology like AI-powered cameras, motion detection, and real-time alerts to identify and prevent potential issues before they escalate. Additionally, our robotic capabilities—including roving vehicles, robot dogs, and tethered drones—offer enhanced security with AI analytics overlaid from both ground and sky perspectives, ensuring no blind spots in crowded, high-risk environments. This combination of cutting-edge technology not only enhances safety for patrons and staff but also reduces liability for owners by providing comprehensive, constant monitoring without the cost and limitations of on-site personnel.

One of the primary benefits of Virtual Guarding is its ability to provide 24/7 remote surveillance. This means that every corner of the venue can be monitored continuously, even in areas that may be hard to reach or where traditional security might be limited. If a potential threat is detected, such as aggressive behavior or suspicious activity, Virtual Guarding systems can immediately notify management or law enforcement, ensuring that issues are addressed swiftly and before they escalate into larger problems.

Security Features

Loitering

Keep a close watch on who enters & exits your property.

Break-In

Identify and stop forced entry before it occurs.

Vandalism

Keep potential damage away from your property.

Theft

Protect your business assets from theft.

Unwanted

Keep protected areas safe by keeping unwanted visitors away.

Unhealthy

Ensure anyone who enters does not pose a health threat.

Intelligent live video monitoring for nightlife venues.

Virtual Guarding provides 360 degrees of security monitoring for nightlife venues. We begin by establishing an invisible perimeter around your property with our high-definition security cameras, and then monitor those cameras live with our hybrid use of human intelligence and artificial intelligence. These virtual security guards are stationed at our Global Fusion Center to monitor your property 24/7.

Our hardware incorporates advanced features such as immediate live audio trespasser deterrents, remote door monitoring for unsecured entrances and exits. Our 4 step process, developed over years in the industry, enables our agents to respond up to 10x faster than traditional intrusion systems that may not even see incidents occurring until several minutes after they have already occurred.

With this as the new standard for nightlife venues monitoring and security, are you protecting your inventory, staff, and property effectively? Get a quote today and find out how Virtual Guarding can help.

Our Services

Virtual Guarding

- Substitute or Enhance Guard Service Anywhere
- AI Based Video Monitoring
- Event Alerting & Response
- Guest & Visitor Screening
- Audible Deterrent Or Police Dispatch
- System Health & Environmental Monitoring
- Door Ajar Monitoring
- Panic Button/Call for Help Alert and Response
- Occupancy Alert Notification
- Incident Reporting

Virtual Gatehouse

- Replace Guard In Gatehouse/ Guard Booth
- Includes All Virtual Guarding Services
- Homeowner Entry Assistance & Event Alerting
- Guest & Visitor Screening with Remote Entry
- License Plate Verification & Reporting

Virtual Package Delivery

- Virtual Screening of Authorized Delivery Services
- Virtual Unlock & Visual Monitoring of Mail Rooms & Warehouses
- Contactless Delivery & Operational Costs
- Live Event Alerting & Response During Deliveries
- Access Control with QR code or Facial Recognition

Virtual Concierge

- All Virtual Package Delivery Services & Remote Guarding Services
- Enhance Lobby Guard or Doorman
- Tenant Entry Assistance
- Live Property Event & Notification Reporting
- Direct Emergency Response or Police Dispatch

Four Steps To Get The Security You Need

How It Works

Reduced Operational Costs · Safer – No Physical Contact · 24/7 Security Monitoring and Support
· Deter Crime and Trespassers Proactively · Immediate Response · Enhanced Security

Step 1

Cameras Detect

Cameras stream within seconds using AI to detect potential threats.

Milliseconds

Step 2

Guards Analyze

Remote guards can respond to potential threats instantly using customized SOP's.

5-20 Seconds

Step 3

Rapid Response

Remote guards engage potential criminals with two-way audio.

10-30 Seconds

Step 4

Escalate As Needed

On-site guards or law enforcement are dispatched.
