

Retail

On average, about 1 in every 10 people in the U.S. has shoplifted at some point in their lives, making it a widespread issue in retail environments. Virtual Guarding has historically cut product shrinkage by 70%.

Retailers face constant threats like shoplifting, vandalism, and employee theft, which can lead to significant financial losses. Traditional security measures, such as on-site guards, are often expensive and limited in their coverage. Virtual Guarding fills this gap by providing continuous, remote monitoring using advanced technology like cameras, AI-driven analytics, and real-time alerts. With capabilities like theft detection with geolocation, Virtual Guarding can compile real-time case reports of known or serial shoplifters targeting multiple stores in a chain, enabling retailers to respond quickly and effectively, reducing the risk of theft and other security incidents.

Virtual Guarding offers a more scalable and adaptable approach to security, particularly for retail spaces with multiple locations or varying foot traffic. It integrates seamlessly with existing security infrastructure, such as access control and intrusion detection systems, to create a comprehensive solution that reduces risks and operational costs. The combination of live video monitoring and AI can detect suspicious activities, allowing for immediate intervention before incidents escalate.

Schedule Your Demo Today!

Virtual Guarding offers 24/7 surveillance of your property by utilizing remote guard monitoring from a central security operations center. With our remote guarding services, your property receives a team of live virtual security guards that monitor your property without the physical security guard cost normally associated with hiring a security guard company.

Security Features

Loitering

Keep a close watch on who enters & exits your property.

Break-In

Identify and stop forced entry before it occurs.

Vandalism

Keep potential damage away from your property.

Theft

Protect your business assets from theft.

Unwanted

Keep protected areas safe by keeping unwanted visitors away.

Unhealthy

Ensure anyone who enters does not pose a health threat.

Intelligent live video monitoring for retail spaces.

Virtual Guarding provides 360 degrees of security monitoring for retail stores. We begin by establishing an invisible perimeter around your property with our high-definition security cameras, and then monitor those cameras live with our hybrid use of human intelligence and artificial intelligence. These virtual security guards are stationed at our Global Fusion Center to monitor your property 24/7.

Our hardware incorporates advanced features such as immediate live audio trespasser deterrents, remote door monitoring for unsecured entrances and exits. Our 4 step process, developed over years in the industry, enables our agents to respond up to 10x faster than traditional intrusion systems that may not even see incidents occurring until several minutes after they have already occurred.

With this as the new standard for retail spaces monitoring and security, are you protecting your inventory, staff, and property effectively? Get a quote today and find out how Virtual Guarding can help.

Our Services

Virtual Guarding

- Substitute or Enhance Guard Service Anywhere
- AI Based Video Monitoring
- Event Alerting & Response
- Guest & Visitor Screening
- Audible Deterrent Or Police Dispatch
- System Health & Environmental Monitoring
- Door Ajar Monitoring
- Panic Button/Call for Help Alert and Response
- Occupancy Alert Notification
- Incident Reporting

Virtual Gatehouse

- Replace Guard In Gatehouse/ Guard Booth
- Includes All Virtual Guarding Services
- Homeowner Entry Assistance & Event Alerting
- Guest & Visitor Screening with Remote Entry
- License Plate Verification & Reporting

Virtual Package Delivery

- Virtual Screening of Authorized Delivery Services
- Virtual Unlock & Visual Monitoring of Mail Rooms & Warehouses
- Contactless Delivery & Operational Costs
- Live Event Alerting & Response During Deliveries
- Access Control with QR code or Facial Recognition

Virtual Concierge

- All Virtual Package Delivery Services & Remote Guarding Services
- Enhance Lobby Guard or Doorman
- Tenant Entry Assistance
- Live Property Event & Notification Reporting
- Direct Emergency Response or Police Dispatch

Four Steps To Get The Security You Need

How It Works

Reduced Operational Costs • Safer – No Physical Contact • 24/7 Security Monitoring and Support
• Deter Crime and Trespassers Proactively • Immediate Response • Enhanced Security

Step 1

Cameras Detect

Cameras stream within seconds using AI to detect potential threats.

Milliseconds

Step 2

Guards Analyze

Remote guards can respond to potential threats instantly using customized SOP's.

5-20 Seconds

Step 3

Rapid Response

Remote guards engage potential criminals with two-way audio.

10-30 Seconds

Step 4

Escalate As Needed

On-site guards or law enforcement are dispatched.
