

Warehouses

The Insurance Information Institute indicates that vandalism costs U.S. businesses an average of \$3,000 per incident, with warehouses often incurring higher repair costs due to structural damage and specialized equipment.

Virtual Guarding has become a necessary security solution for warehouses due to the increasing threats of vandalism and theft, which can lead to significant financial losses and operational disruptions. Vandalism poses a threat, with damage to property and equipment not only incurring repair costs but also potentially halting production and disrupting supply chains.

Virtual Guarding utilizes advanced surveillance technology and real-time monitoring systems, enabling security personnel to oversee multiple locations simultaneously from a remote site. In addition to continuous monitoring, we provide advanced solutions for warehouses, including ceiling-mounted drones that can inspect for slip-and-fall hazards, ensure doors are properly opened or closed, check for proper use of personal protective equipment, and help prevent accidents related to material stacking. These innovative features ensure a safer, more secure environment, reducing risks and enhancing operational efficiency. By integrating this innovative security solution, warehouses can protect their assets, streamline operations, and foster a safer working environment, ultimately contributing to their long-term success and resilience against evolving threats.

Schedule Your Demo Today!

Virtual Guarding offers 24/7 surveillance of your property by utilizing remote guard monitoring from a central security operations center. With our remote guarding services, your property receives a team of live virtual security guards without the physical security guard costs typically associated with hiring on-site personnel.

Security Features

Loitering

Keep a close watch on who enters & exits your property.

Break-In

Identify and stop forced entry before it occurs.

Vandalism

Keep potential damage away from your property.

Theft

Protect your business assets from theft.

Unwanted

Keep protected areas safe by keeping unwanted visitors away.

Unhealthy

Ensure anyone who enters does not pose a health threat.

Intelligent live video monitoring for manufacturing facilities.

Virtual Guarding provides 360 degrees of security monitoring for manufacturing facilities. We begin by establishing an invisible perimeter around your property with our high-definition security cameras, and then monitor those cameras live with our hybrid use of human intelligence and artificial intelligence. These virtual security guards are stationed at our Global Fusion Center to monitor your property 24/7.

Our hardware incorporates advanced features such as immediate live audio trespasser deterrents, remote door monitoring for unsecured entrances and exits. Our 4 step process, developed over years in the industry, enables our agents to respond up to 10x faster than traditional intrusion systems that may not even see incidents occurring until several minutes after they have already occurred.

With this as the new standard for manufacturing facilities monitoring and security, are you protecting your inventory, staff, and property effectively? Get a quote today and find out how Virtual Guarding can help.

Our Services

Virtual Guarding

- Substitute or Enhance Guard Service Anywhere
- AI Based Video Monitoring
- Event Alerting & Response
- Guest & Visitor Screening
- Audible Deterrent Or Police Dispatch
- System Health & Environmental Monitoring
- Door Ajar Monitoring
- Panic Button/Call for Help Alert and Response
- Occupancy Alert Notification
- Incident Reporting

Virtual Gatehouse

- Replace Guard In Gatehouse/ Guard Booth
- Includes All Virtual Guarding Services
- Homeowner Entry Assistance & Event Alerting
- Guest & Visitor Screening with Remote Entry
- License Plate Verification & Reporting

Virtual Package Delivery

- Virtual Screening of Authorized Delivery Services
- Virtual Unlock & Visual Monitoring of Mail Rooms & Warehouses
- Contactless Delivery & Operational Costs
- Live Event Alerting & Response During Deliveries
- Access Control with QR code or Facial Recognition

Virtual Concierge

- All Virtual Package Delivery Services & Remote Guarding Services
- Enhance Lobby Guard or Doorman
- Tenant Entry Assistance
- Live Property Event & Notification Reporting
- Direct Emergency Response or Police Dispatch

Four Steps To Get The Security You Need

How It Works

Reduced Operational Costs · Safer – No Physical Contact · 24/7 Security Monitoring and Support
· Deter Crime and Trespassers Proactively · Immediate Response · Enhanced Security

Step 1

Cameras Detect

Cameras stream within seconds using AI to detect potential threats.

Milliseconds

Step 2

Guards Analyze

Remote guards can respond to potential threats instantly using customized SOP's.

5-20 Seconds

Step 3

Rapid Response

Remote guards engage potential criminals with two-way audio.

10-30 Seconds

Step 4

Escalate As Needed

On-site guards or law enforcement are dispatched.
